PROFESSIONAL STATEMENT

Cloud-native Full Stack & DevOps Developer focused on scalable architecture, Kubernetes orchestration, and automated infrastructure. I build secure, observable systems with Terraform, AWS services, and modern CI/CD practices. Currently engineering a distributed file delivery platform to strengthen my system design and SRE capabilities.

SKILLS

Cloud & DevOps	AWS (EKS, API Gateway, CloudFront, S3, SQS, RDS) GCP (GKE) Terraform Docker Kubernetes Helm GitHub Actions Prometheus Grafana OpenTelemetry CloudWatch CI/CD Linux Bash Networking Load Balancing Ingress
Backend	Node.js Express.js Python REST API SQL MongoDB Git
Frontend	Vue 3 React.js Next.js HTML/CSS
Others	Mandarin [Native] English [Bilingual] Thai [Intermediate] Spanish [Beginner]

PROFESSIONAL EXPERIENCE

Harvey Norman Commercial Division - Web Developer

Sep 2025 - Present

- Migrated multiple legacy WordPress sites to a modern headless architecture, integrating WordPress as a CMS with a **Next.js** frontend for improved performance and scalability.
- Boosted website SEO performance by over **30%** through **optimised site structure, metadata enhancement, and improved content delivery** strategies.
- Elevated user experience by implementing **smooth page transitions, micro-interactions, and engaging animations** to increase user engagement.
- Redesigned the main websites with a **contemporary, interactive interface**, delivering a visually immersive and user-centred browsing experience.
- Integrated and documented **GitHub workflows** into the team's web development process, improving collaboration and increasing deployment efficiency by over **50%**.

PSS Group - DevOps Engineer

Sep 2024 - Oct 2025

- Appointed as the DRI for **GCP infrastructure** and **Kubernetes clusters**, co-leading their optimisation and operational reliability.
- Designed and delivered a real-time monitoring dashboard with **Vue 3** and **Express.js**, improving workload efficiency and user satisfaction by 40%, deployed on GKE with **GitHub Actions**.
- Led and mentored a team of 4 engineers on a Visitor Access System, generating over **AUD \$1M in revenue** and expanding to enterprise clients.
- Oversaw **CI/CD pipelines**, containerisation with **Docker**, and infrastructure monitoring using **Prometheus** and **Grafana** to ensure system resilience.
- Onboarded and guided 4 new developers, supporting ongoing development of enterprise-grade **Vue** and **Node.js** applications.

PROJECTS

Distributed File Delivery Platform - Personal Project | [GitHub](#)

2025

Designed and built a production-grade, event-driven file storage and delivery system on **AWS**, demonstrating cloud architecture, **IaC**, **Kubernetes**, and **observability** at scale.

- Architected a scalable distributed system using **AWS EKS, API Gateway, CloudFront, S3, SQS, and RDS PostgreSQL**, supporting secure uploads up to 50MB and per-user quotas.
- Implemented **presigned URL** upload flow and **signed CDN download URLs**, enabling secure, low-latency delivery through **CloudFront edge networks**.
- Built and deployed Upload **API and SQS Worker services** using Kubernetes (EKS), with autoscaling via HPA and queue-depth policies.
- Created full infrastructure using **Terraform**: VPC, EKS cluster, node groups, S3 bucket policies, IAM roles, RDS, SQS, and CloudFront.
- Implemented end-to-end observability using **AWS Distro for OpenTelemetry and CloudWatch**, including traces, structured logs, dashboards, and alerts. •Delivered a **CI/CD pipeline via GitHub Actions** for container builds, security scans, automated tests, and Kubernetes deployments.
- Produced comprehensive **system design** documentation, **rchitecture diagram**, runbook, and deployment patterns aligned with industry DevOps standards.

EDUCATION

Bachelor of Information Technology with Distinction

Feb 2021 - Dec 2023

RMIT University - Melbourne City Campus

- Selected as a peer mentor for five courses over two years, based on achieving top 20% grades in each course

ACHIEVEMENTS AND CERTIFICATIONS

- Scholarships** - Science, Engineering and Health Scholarship 2021
- Awards** - Global Leader Experience 2021
- Certification** - AWS Academy Graduate - AWS Academy Cloud Foundations
